

# Is it more than COPD?

These symptoms, well-documented in the patient's medical record, are the requirements for consideration of reimbursement by Medicare, Medicaid, and Private insurance for HFCWO airway clearance.

Patients that have these symptoms should be screened via HRCT scan for Bronchiectasis

Daily productive  
(mucus) cough for  
at least  
6 continuous months

or

Frequent  
(i.e. more than 2/yr)  
exacerbations/chest  
infections requiring  
antibiotic therapy

&

Well-documented failure  
of other treatments to  
adequately mobilize  
retained secretions/  
airway clearance

&

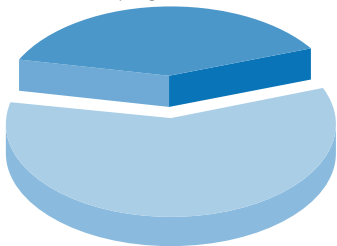

Diagnosis of  
Bronchiectasis  
confirmed via  
CT scan

# 42%

**5M may have Bronchiectasis\***

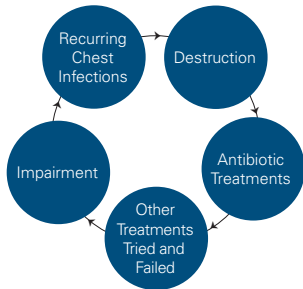

500,000\* already diagnosed with Bronchiectasis

**COPD Patient  
Population of 12 Million**

\*Demonstrated by recent clinical studies and industry papers

## Break the Vicious Cycle of Bronchiectasis
